Research overview

Summary — I build **human–robot collaborative systems** that learn through their interactions. My research draws upon recent innovations in machine learning as well as foundational techniques in artificial intelligence for designing systems that learn and utilize **abstract knowledge** to make social and physical interactions more **naturalistic** and **robust**.

Education

2016-Current — **Ph.D. in Computer Science** Yale University, Advisor: Brian Scassellati

2012-2016 — **B.A. in Cognitive Science; Computer Science minor** Vassar College

Research Experience

2016-Current — **Robotics Ph.D. student** –Social robotics laboratory, *Yale University*
Human–robot collaboration research under the supervision of Professor Brian Scassellati.

2014-2015 — **Research Fellow** –Interdisciplinary robotics research lab, *Vassar College*
Designed and programmed a genotype-phenotype mapping scheme for mobile behavior-based robots incorporating sexual reproduction and ontogenetic factors.

Technical and scientific skills

Programming	**Python** (and scientific tools), **C-C++**, **LaTeX**, **Git**, **Jekyll**, **Emacs**, **Continuous integration** (with Travis), Docker
ML/AI Tools	Scikit-learn, Pytorch, NLTK, ROS
Robots	6+ years experience with **Baxter research robot**, 3+ years experience with **UR5 robot**
System	8+ years of daily **Linux** experience
